PE.A.C.E. Investigative Interviewing Introduction Course

The ‘P.E.A.C.E.’ framework of Investigative Interviewing provides a forensically robust model to secure complete, accurate, and reliable information in order to assist informed investigative decision-making.

This Introduction course outlines the detail of this process, demonstrating how to maximize opportunity to capture detailed information in a forensically robust, ethical, and transparent manner; emphasizing and evidencing the benefits of recording the process accurately, and how to ‘test’ the accuracy and honesty of what those interviewed tell you!

The course introduces core knowledge and context and is aimed at those working within any investigative role and any others who undertake investigative interviews
Forensic Interview Solutions FIS® Limited

By the end of this course the delegates will:

- Understand the P.E.A.C.E. model of interviewing
- Recognize the added value, security, and risk reduction of recording interviews
- Appreciate the business benefit of an applied strategic interview structure
- Equip participants with the skills to process investigation issues, complaints in the most efficient and effective manner to achieve successful outcomes
- Increase detection and conviction levels
- Raise and accelerate staff confidence and enhance their professional development
